EXPERIENCE

Software developer — Jan. 2023 – Present
TechBuddies IT Services (P) Ltd — *Noida, India*

- Developed and maintained web applications across e-commerce and CRM domains.

PROJECTS

E-commerce website

- Project Overview : Contributed to the development of a scalable,user-friendly,and secure e-commerce website that connects users with sellers.The platform offers both customer and admin interfaces.Admins can manage products, track sales performance, and view orders etc, while customers can browse products,place orders, view order history, track shipments, and manage their profiles etc
- Implemented Add to Cart functionality.
- Developed Admin Dashboard to manage product module, categories module, users etc.
- Implemented third party ecart shipping api on Order place.
- Implemented automated email notifications for User Registration,Order Placement,Delivery Confirmation etc.

Market Research (CRM System)

- For their CRM I have integrated third party marketplace APIs, in which I have used APIs such as survey ,questions, options, quota, which user can use to create a survey before launching their product.
- Developed a download system for invoice PDFs and data CSV files.

Online News Protal

- Project Overview : Online News Protal is a online communiction medium for internet user which are read all over the world.there are two module user module and admin module.
- User Module : anyone can read the news and also search for particular news.The reader can leave comment on then particular news.
- Admin Panel: There are following module in Admin panel like secure admin login system,Admin dashboard, category module, sub category module.etc
